

Slope Conversion Charts

Course Handicap Conversion Tables

Overview

The following pages contain Course Handicap Conversion Tables, which are used to convert your Handicap Factor to a Course Handicap for the course and tees you are playing.

The Slope Rating defines a course's degree of difficulty for the average golfer and is what makes your handicap "portable." The higher the Slope, the more difficult the average golfer will find the course, and thus the higher his or her Course Handicap will be.

The tables are in order by Slope Rating and are easy to use:

- 1) Find the table with the Slope Rating for the course you are playing;
- 2) Find the range containing your Handicap Factor;
- 3) Look in the right column for your corresponding Course Handicap.

Example – How Slope Affects Your Course Handicap

When you play a course with a higher Slope, you will have a higher Course Handicap than you do on a course with a lower Slope. A player with a 12.1 Handicap Factor would play with a Course Handicap of 15 on a course with a Slope Rating of 136 and with a 12 on a course with a Slope Rating of 116.

SLOPE 136		
HANDICAP FACTOR		COURSE HANDICAP
9.6 to 10.3		12
10.4 to 11.2		13
